

How are they installed?

Experience the ultimate freedom of movement with our I-Link extensions. Using the strand-by-strand method, each extension is attached to your natural hair with a bead, providing full 360° movement. This versatile technique allows you to wear your hair in multiple styles, from high ponytails to flowing locks with eye-catching length and volume.

Why choose I-Links?

Volume boost: Ideal for medium to thick hair, I-Links offer an instant volume boost, making them perfect for women seeking to enhance their hair's natural thickness and fullness.

Full movement: With 360° movement, I-Links provide a completely natural look and feel, allowing you to move and style your hair with ease.

Chemical-free installation: I-Links are attached to your natural hair using one of our beads—grooved, silicone, or flare—without the need for chemicals, adhesives, or heat, ensuring a gentle and non-damaging application and removal process.

Convenient touch-ups: Say goodbye to the hassle of removing extensions for root touch-ups. With I-Links, you can easily access your roots for color touch-ups without disrupting your extensions. While these extensions offer long-lasting wear, we recommend scheduling maintenance appointments every 6-8 weeks to keep your look fresh.

Texture options: Whether you have curly, wavy, or straight hair, I-Links come in all three textures, ensuring a seamless blend with your natural hair texture.

Unlock the potential for effortless style and movement with I-Link extensions at Sage Hair Collective. Book your consultation today and discover a world of endless possibilities for your hair!
