

How are they installed?

Experience the perfect fusion of versatility and seamless blend with Flat-Tip extensions. Similar to I-Link extensions, Flat-Tips are attached strand by strand to your natural hair using beads. However, these extensions feature a flat-tipped strand design, offering the full 360° movement of I-Links combined with the seamless blend of Tape-Ins.

Why choose Flat-Tips?

Best of both worlds: Enjoy the benefits of both I-Links and Tape-Ins with Flat-Tips, combining the movement of I-Links with the flat design of Tape-Ins for a flawless blend that's perfect for any style.

Chemical-free installation: Like I-Links, Flat-Tips are attached to your natural hair with beads, eliminating the need for chemicals or adhesives. This gentle installation method ensures a safe and non-damaging application process.

Heat-resistant: Flat-Tips are heat-resistant, making them ideal for adding instant length and volume to your hair without the use of heat styling tools.

Convenient touch-ups: With Flat-Tips, there's no need to remove your extensions for root touch-ups. This hassle-free maintenance option allows you to easily access your roots for color touch-ups while keeping your extensions in place.

Long-lasting wear: With proper aftercare, Flat-Tip extensions can be worn for 6-10 weeks between maintenance appointments, ensuring a long-lasting and beautiful look.

Experience the ultimate blend of versatility and style with Flat-Tip extensions at Sage Hair Collective. Book your consultation today and discover the perfect solution for achieving your dream hair!
